EXECUTIVE SUMMARY

Weston & Sampson Engineers, Inc. (Weston & Sampson), on behalf of the Town of Waterbury, has prepared this Phase I Environmental Site Assessment (ESA) for a 60-acre property, known as Randall Meadow in Waterbury, Vermont (the Subject Property). Findings of the Phase I ESA are as follows:

- The earliest identified development was for agricultural use before 1942. Between 1948 and 1960, an access road and wastewater treatment plant were constructed in the southern portion. By 1986, portions of the adjoining State Hospital/Offices complex parking lots and State Drive extended onto the southeastern edge. In 2015, the parking lot was reconstructed during major renovations and demolition at the complex. Aside from the complex, the surrounding area has been densely developed for residential use since the late 1800s.
- Polycyclic aromatic hydrocarbons (PAHs) and metals were identified in a soil berm extending onto the Subject Property from the State Hospital powerhouse. Similar impacts are likely present on the Subject Property and represent a Recognized Environmental Condition (REC).
- In 1993, approximately 50 yards of impacted soil from the removal of fuel oil underground storage tanks (USTs) at the State Hospital/Office Complex were stockpiled, tested, and emplaced beneath clean soil cover. The exact location is unknown and may include the Subject Property. This represents a REC unless documentation confirms its location and Vermont Department of Environmental Conservation (VTDEC) approval, in which case it would be considered a Controlled Recognized Environmental Condition (CREC).
- A 1987 release of 2,200 gallons of gasoline at the Village of Waterbury garage, less than 500-feet upgradient of the Subject Property, impacted groundwater and indoor air. The boundary monitoring well, located on the edge of the Subject Property, showed no detections in 2009, though reporting limits exceeded current Vermont Groundwater Enforcement Standards (VGES). Given lower current standards and documented plume migration, likely groundwater impacts are considered a REC.
- During the 2002 closure of a 550-gallon fuel oil UST at the adjoining 21 Elm Street property, soil contamination was identified. No groundwater exceedances were reported, but groundwater downgradient of the UST was not assessed. Potential migration of impacted groundwater is considered a REC.
- A 2009 closure of a 1,000-gallon UST, 200 feet upgradient of the Subject Property at 22 Randall Street, listed the UST in poor condition. A release is considered likely and represents a REC.
- In 2023, chlorinated volatile organic compounds (VOCs) were identified in groundwater and soil gas at 51 South Main Street, roughly 500 feet upgradient of the Subject Property. The extent is undefined and likely extends to the Subject Property. This release is considered a REC.
- At least five automotive repair facilities have historically operated within 700-feet upgradient of the Subject Property. Automotive facilities are commonly associated with releases of contaminants, including chlorinated VOCs. Likely releases from these facilities are considered a REC.
- The Subject Property is located within a VTDEC-designated Urban Background Area, where arsenic, lead, and PAHs are common in subsurface soils unrelated to specific releases. An investigation recently conducted at the Subject Property confirmed the presence of PAH impacts below the Urban Background value. Such impacts represent a Business Environmental Risk (BER) that would require management during redevelopment.
- No significant data gaps have been identified for this ESA.

It is Weston & Sampson's opinion that additional investigation is appropriate to evaluate the RECs identified in this Phase I ESA.

1.0 INTRODUCTION

Weston & Sampson Engineers, Inc. (Weston & Sampson), on behalf of the Town of Waterbury (the Town), has prepared this Phase I Environmental Site Assessment (ESA) for a 60-acre property known as Randall Meadow and located on Randall Street in Waterbury, Vermont (the Subject Property). The Subject Property is primarily agricultural fields with a dirt walking path (a portion of the Cross Vermont Trail) along the Winooski River. The southeastern portion of the property (approximately 1.5 acres) is developed with part of the parking lot and the State Drive roadway serving the Vermont State Office Complex. **Figure 1** shows the general location of the Subject Property in Waterbury and **Figure 2** is a Site Map showing pertinent details and the surrounding area.

This ESA was performed in accordance with the ASTM Standard Practice for Environmental Site Assessments: Phase I Site Assessment Process, Designation E1527-21 (the ASTM Standard Practice) and conforms with the EPA All Appropriate Inquiry (AAI) Rule. The Phase I ESA was performed to assess the Subject Property with respect to the range of potential contaminants within the scope of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA; 42 U.S.C. §9601). This practice is intended to help the Town meet any obligations detailed in Section 4.8.

1.1 Purpose

Weston & Sampson was requested by the Town to complete an ASTM Phase I ESA of the Subject Property in advance of a potential property transaction. This practice is intended to permit the Town to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on CERCLA liability; that is, the practices that constitute "all appropriate inquiry into the previous ownership and uses of the Subject Property consistent with good commercial or customary practice" as defined in 42 U.S.C. § 9601(35)(B).

The purpose of the Phase I ESA is to identify Recognized Environmental Conditions (RECs) in connection with the Subject Property at the time of the Subject Property evaluation. The term Recognized Environmental Condition refers to "(1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of future release to the environment."

The ASTM definition of REC does not include de minimis conditions, which generally do not present a threat to human health or the environment and would not be the subject of an enforcement action if brought to the attention of the appropriate governmental agencies.

The identification of RECs in connection with the Subject Property may impose an environmental liability on owners or operators of the Subject Property, reduce its value, or restrict its use or marketability. Further investigation may be warranted to evaluate the scope and extent of potential environmental liabilities.

Any significant scope-of-work additions, deletions or deviations to ASTM Practice E1527-21 are noted below or in pertinent sections of this report.

1.2 Scope of Work

This Phase I ESA was conducted using a standard of good commercial and customary practice consistent with the ASTM Standard Practice and included the following tasks:

- Review of previous environmental records and reports (if available)
- Regulatory records review
- Interviews (in-person, via phone, or via questionnaire)
- A Subject Property visit
- Evaluation of information and preparation of the report

Any significant scope-of-work additions, deletions, or deviations to the ASTM Standard Practice are noted below or in the corresponding sections of this report. A copy of the scope of services between Weston & Sampson and the Town, specifying the work to be performed and responsibilities of the User, is included in **Appendix A**.

Releases of contaminants not defined as hazardous substances under CERCLA, but for which state or tribal regulations may require cleanup (including "emerging contaminants"), if documented, are discussed in appropriate sections throughout this report and as findings in Section 9. In accordance with the ASTM Standard Practice, if such a release presents a "risk which can have material environmental or environmentally driven impact on the business associated with the current or planned use," it is further defined as a Business Environmental Risk (BER) in Section 9.

Unless requested, a Phase I ESA does not include sampling or testing of air, soil, groundwater, surface water, or building materials. Although this Phase I ESA considers releases to all environmental media, including soil vapor, a formal vapor encroachment screening is not required by the Standard Practice, and is not included in this report.

1.3 Significant Assumptions

There is a possibility that, even with the proper application of these methodologies, there may exist Subject Property conditions that were not reasonably identifiable. Weston & Sampson believes that the information obtained from the record review and the interviews is reliable; however, Weston & Sampson cannot, and does not, warrant or guarantee that the information provided by third-party sources is accurate or complete. The methodologies of this assessment are not intended to produce all-inclusive or comprehensive results, but to provide the Town with information relating to the presence or likely presence of RECs in connection with the Subject Property.

1.4 Limitations and Exceptions

The findings, opinions, and conclusions provided by Weston & Sampson are based solely on the information provided in this document. Future investigations and/or information that was not available to Weston & Sampson may result in a modification of the report findings. Should additional information become available, that information should be provided to Weston & Sampson for review so that the report conclusions may be modified if necessary. The report conclusions are based on conditions observed at the Subject Property at the time of the investigation, information provided by the Town, information provided by Environmental Data Resources, Inc. (EDR), and information provided by federal, state, and local agencies.

This report has been prepared in accordance with the ASTM Standard Practice and generally accepted engineering and geological practices. No other warranty, express or implied, is made. This assessment did not include a review or audit of operational environmental compliance issues, or of any environmental management systems (EMS) that may exist at the Subject Property.

Section 4.6.2 of ASTM E1527-21 identifies five (5) components of a Phase I ESA that must be conducted or updated within 180 days prior to the date of acquisition, or the transaction, to maintain continued viability of the Report. The five (5) components and the dates on which they were conducted for this Phase I ESA are:

- 1) Interviews with owners, operators, and occupants - October 14 and October 21, 2025
- 2) Searches for recorded environmental cleanup liens - User responsibility
- 3) Reviews of federal, tribal, state, and local government records - September 24, 2025
- 4) Visual inspections of the Subject Property and adjoining properties - September 10, 2025
- 5) The declaration of the environmental professional responsible for the assessment or update - October 31, 2025

1.5 Deviations

Except for the limitations and exceptions discussed in Section 1.4, this Phase I ESA complies with the ASTM Standard Practice. Weston & Sampson did not deviate from the scope outlined in Section 1.2.

1.6 Special Terms and Conditions

Authorization was given by the Town on August 12, 2025. Instructions as to the location of the Subject Property, access, and an explanation of the Subject Property and facilities to be assessed were provided by the Town.

1.7 Reliance

This report may be distributed and relied upon only by the Town. Reliance on the information and conclusions in this report by any other person or entity is not authorized without the written consent of Weston & Sampson and the Town.

2.0 SUBJECT PROPERTY DESCRIPTION

2.1 Location and Legal Description

The Subject Property is located at Randall Street, in Waterbury, VT, and is identified by parcel identification number: 696-221-11909. The approximate center of the Subject Property is located at:

- Latitude: 44.334113 North
- Longitude: -72.758868 West

2.2 Subject Property and Vicinity Description

The Subject Property is primarily agricultural fields with a dirt walking path (a portion of the Cross Vermont Trail) along the Winooski River. The southeastern portion of the property (approximately 1.5 acres) is developed with part of the parking lot and the State Drive roadway serving the Vermont State Office Complex. Topography gently slopes to the southwest towards the adjoining Winooski River. The Subject Property is accessed via State Drive to the east.

The surrounding area is primarily mixed-use for residential and commercial. The Vermont State Office Complex is located to the southeast of the Subject Property.

2.3 Current Use of the Subject Property

The Subject Property is zoned mixed residential and is currently used as a parking lot, agricultural fields, and a walking path.

2.4 Description of Structures and Other Improvements

The Subject Property is not currently developed with any structures.

2.5 Adjoining Property Information

Weston & Sampson identified the following information regarding adjoining properties:

Adjoining Properties			
Compass Direction	Occupant	Apparent Use	Comments
Northwest	Multiple	Residential	Multiple residential Properties
Northeast	Multiple	Residential & Institutional	Multiple residential Properties and the Vermont State Office Complex are located to the northeast of the Subject Property.
Southeast	Vermont State Office Complex	Institutional	The Vermont State Office Complex is also located to the southeast of the Subject Property.
Southwest	Winooski River		The Winooski River runs along the southwestern edge of the Subject Property.

3.0 SITE RECONNAISSANCE

Mr. Daniel Schuckers, Geologist I with Weston & Sampson, conducted field reconnaissance on September 10, 2025. Mr. Taylor Smith, CHMM, a Project Environmental Scientist with Weston & Sampson, is defined as the Environmental Professional for this Phase I ESA and participated in planning the field reconnaissance.

3.1 Methodology and Limiting Conditions

Weston & Sampson conducted field reconnaissance in accordance with Section 9 of the Standard Practice. Field reconnaissance consisted of observing the Subject Property boundaries from adjacent thoroughfares and/or accessible properties, and systematically traversing the Subject Property to provide an overlapping field of view, wherever possible.

Photographs taken during field reconnaissance are provided in **Appendix B**.

No limiting conditions were encountered during field reconnaissance.

3.2 General Setting

The Subject Property is primarily agricultural fields with a dirt walking path (a portion of the Cross Vermont Trail) along the Winooski River. The southeastern portion of the property (approximately 1.5 acres) is developed with part of the parking lot and the State Drive roadway serving the Vermont State Office Complex. Topography gently slopes to the southwest towards the adjoining Winooski River. The Subject Property is accessed via State Drive to the east.

The surrounding area is primarily residential and commercial.

3.3 Site Reconnaissance Findings

The following table contains a summary of field reconnaissance findings:

Site Reconnaissance Findings Summary		
Condition / Feature	Observed	Comments
Hazardous Substances	No	
Petroleum Products	No	
Underground Storage Tanks (USTs)	No	
Aboveground Storage Tanks (ASTs)	No	
Drums	No	
Other Suspect Containers	No	
Odors	No	
Equipment Likely to Contain Polychlorinated Biphenyls (PCBs)	Yes	One pad-mounted transformer with a "NON-PCB" sticker was observed on the eastern edge of the Subject Property. The transformer appeared in good condition.
Interior Staining and Corrosion	No	
Heating and Cooling Equipment	No	
Drains and Sumps	Yes	Two stormwater outfalls from Randall Street are located on the Subject Property.
Pits, Ponds, and Lagoons	Yes	A stormwater retention pond is located on the southern edge of the Subject Property.
Pools of Liquid	No	
Solid Waste Dumping and Landfills	No	

Condition / Feature	Observed	Comments
Stained Soil and Stressed Vegetation	No	
Wells	No	
Wastewater and Septic Systems	No	

4.0 USER-PROVIDED INFORMATION

The information requested in the User Questionnaire is intended to assist the User in meeting their obligations under the ASTM Standard Practice and to assist the Environmental Professional in gathering evidence to identify RECs. The Town was identified as the User of the report and Mr. Tom Leitz, Municipal Manager with the Town of Waterbury, provided the User responses. A copy of the User Questionnaire is provided in **Appendix C**. The following subsections summarize User responses.

4.1 Owner, Property Manager, and Occupant Information

The State of Vermont, with offices at 133 State Street, Montpelier, Vermont, owns and operates the Subject Property. Ms. Wanda Minoli, Commissioner of the State of Vermont Department of Buildings and General Services, filled out the Owner Questionnaire.

No residential occupants are currently present at the Subject Property.

4.2 Environmental Liens

The Town reported no environmental cleanup liens filed against the Subject Property.

4.3 Activity and Use Limitations

The Town reported no Activity and Use Limitations (AULs) in place at the Subject Property.

4.4 Specialized Knowledge

The Town reported no specialized knowledge as it relates to the current and/or former use of the Subject Property.

4.5 Commonly Known or Reasonably Ascertainable Information

The Town reported no commonly known or reasonably ascertainable information about the Subject Property that would be indicative of releases or threatened releases.

4.6 Valuation Reduction for Environmental Issues

The Town reported no reduction in the value of the Subject Property due to real or perceived environmental issues.

4.7 Degree of Obviousness of Contamination

The Town reported no obvious indicators that point to the presence or likely presence of contamination at the Subject Property.

4.8 Reason For Performing Phase I ESA

The Town reported that the Phase I ESA is being conducted as part of environmental due diligence prior to the potential purchase of the Subject Property.

4.9 User-Provided Documents

The Town provided a report completed by Ross Environmental Associates, Inc., detailing shallow soil sampling conducted at the Subject Property in 2025. The report indicated that Polycyclic Aromatic Hydrocarbons (PAHs) were identified in shallow soils at the Subject Property at concentrations exceeding the residential Vermont Soil Standards (VSS), but below the applicable Urban Background value. Because the Subject Property is located in an Urban Background area, the detection does not require reporting (and therefore constitute a REC), however, impacts represent a Business Environmental Risk (BER) that would require management during redevelopment. This report is included in **Appendix D**.

5.0 RECORDS REVIEW

Performance of a Phase I ESA in accordance with the ASTM Standard Practice requires the review of practically reviewable publicly available records to define the regulatory history, physical setting, and history of use of the Subject Property, adjoining properties, and pertinent surrounding properties. The regulatory review is performed to understand the nature of any releases that have occurred within approximate minimum search distances of the Subject Property that have the potential to impact environmental media (i.e. soil, groundwater, and vadose zone) at the Subject Property. Physical setting information is reviewed to evaluate the general soil conditions and the presence and movement of groundwater. Historical information sources are evaluated to develop the historical Subject Property uses, to the extent feasible, back to the first development Site or 1940, whichever is earlier. These reviews help identify the likelihood that past releases and/or uses have led to RECs.

Weston & Sampson used a third-party data provider, Environmental Data Resources (EDR) of Shelton, Connecticut, to develop this information and meet the requirements of the ASTM Standard Practice. All data sources are defined in the following sections of this report and are referenced in **Appendices E, F, G, H, and I**.

Weston & Sampson may have reviewed other records. Any additional records that are reviewed are cited in the appropriate section of the report and in Section 12.0.

5.1 Physical Setting Records Review

In accordance with the ASTM Standard Practice, physical setting sources were reviewed to understand the nature of the topography, geology (soil and bedrock), and hydrogeology of the Subject Property. In addition, observations made during the Subject Property reconnaissance and information provided by EDR were consulted. In general, Weston & Sampson reviews available topographic, soil, and geologic maps, as well as the online Vermont ANR Atlas.

5.1.1 Topography

Topography of the Subject Property gently slopes to the southwest towards the adjoining Winooski River. The Subject Property is situated approximately 405 feet above mean sea level. **Figure 1** depicts the Subject Property and surrounding topography based on the United States Geological Survey (USGS) Quadrangle 7.5-minute series topographic map.

5.1.2 Geology

Overburden soil and bedrock geology sources included observation during the Subject Property reconnaissance, the United States Department of Agriculture (USDA) Soil Conservation Service (SCS) information provided by EDR, the online Vermont ANR Atlas, and the Geologic Map of Vermont (Ratcliffe, N.M. et al, 2001).

5.1.2.1 Soil

Surficial soils at the Subject Property are classified as a Sunday fine sand, a Salmon very-fine sandy loam, a Weider very-fine sandy loam, and a Waitsfield silt loam.

The Subject Property is also located within a Designated Urban Soil Zone as defined by the VTDEC and shown on the online ANR Atlas. These are areas in which the use of VTDEC urban background values for concentrations of polycyclic aromatic hydrocarbons (PAHs) in soil may be used when evaluating contaminant concentrations.

5.1.2.2 Bedrock

Bedrock geology at the Subject Property is mapped partially as a Carbonaceous phyllite member of the Ottauquechee Formation, dated to the Cambrian age, and partially as a schist member of the Jay Peak Formation dated to the Cambrian and Neoproterozoic ages. Bedrock was not observed during the field reconnaissance.

5.1.3 Hydrogeology

The direction of local groundwater flow was inferred from a review of local surface topography. Weston & Sampson reviewed topographic maps to identify the nearest surface water bodies and VT ANR Atlas records for reports of groundwater elevations and flow directions.

5.1.3.1 Groundwater

It is anticipated that local groundwater flow is to the southwest toward the adjoining Winooski River.

5.1.3.2 Surface Water

The nearest surface water is the Winooski River, which runs along the southwestern edge of the Subject Property.

5.2 Historical Records Review

For this Phase I ESA, historical property information was compiled and analyzed to develop a history of the previous uses of the Subject Property, adjoining properties, and the surrounding area to help identify the likelihood of past uses having led to a REC for the Subject Property. EDR provided the following historical sources: aerial photographs, topographic maps, and city directories.

5.2.1 Sanborn Fire Insurance Maps

Fire insurance map coverage was not available for this area.

5.2.2 Topographic Maps

Topographic maps were reviewed and are summarized in the table below. Topographic maps are included in **Appendix F**.

Topographic Maps Summary				
Year	Quad	Subject Property Comments	Adjoining Properties Comments	Surrounding Area Comments
1919	Montpelier	The Subject Property is not mapped on this topographic map.	Adjoining properties are not mapped on this topographic map.	A rail line is mapped parallel to the Winooski River to the east.
1921	Richmond	The Subject Property is shown to be developed with a residence on Randall Street and a road (State Drive). The Winooski River is depicted with a slightly different course than the current and runs through the southeastern corner of the Subject Property. State Drive is shown with a different alignment than the current.	Adjoining properties are developed with residential buildings to the northeast, a church to the northwest, and the State Insane Hospital to the west. The powerhouse for the State Hospital adjoins the Subject Property to the east. The Winooski River runs along the southwestern edge of the Subject Property.	The surrounding area appears to be densely developed along South Main Street and nearby streets for commercial and residential uses.

Year	Quad	Subject Property Comments	Adjoining Properties Comments	Surrounding Area Comments
1944	Camels Hump, Montpelier	No significant changes.	No significant changes.	No significant changes.
1948	Waterbury	The residence formerly shown on the Subject Property is no longer depicted.	The State Insane Hospital is now labeled State Hospital. The chimney for the adjoining powerhouse is now labeled. An electrical substation is now shown adjoining the Subject Property to the northwest.	No significant changes.
1968	Montpelier	The Subject Property is not mapped on this topographic map.	Adjoining properties are not mapped on this topographic map.	No significant changes.
1976, 1980	Middlesex, Waterbury	A wastewater treatment plant is shown in the southeast of the Subject Property. A structure is shown near the State Hospital buildings on the southeastern boundary of the Subject Property. State Drive is shown with the current alignment. The Winooski River is no longer shown on the Subject Property, rather, it runs in the current course along the southwestern edge of the Subject Property.	The Winooski River runs in the current course along the southwestern edge of the Subject Property.	No significant changes.
2012 - 2018	Waterbury, Middlesex	No significant changes.	No significant changes.	The Waterbury Fire Station is shown on South Main Street to the northeast.
2021	Waterbury, Middlesex	The Cross Vermont trail is shown on the Subject Property.	No significant changes.	No significant changes.

5.2.3 Aerial Photos

Aerial photographs were reviewed and are summarized in the table below. Aerial photographs are included in **Appendix G**.

Aerial Photos Summary				
Year	Subject Property Comments	Adjoining Properties Comments	Surrounding Area Comments	
1942	The Subject Property appears to be used as farmland.	The Vermont State Hospital adjoins the Subject Property to the southeast. Adjoining properties to the north and east are residential. The Winooski River adjoins the Subject Property to the southwest.	The surrounding area appears to be mixed residential and commercial.	
1960 - 1976	There is an access road and a small building in the southeast corner of the Subject Property.	No significant changes.	No significant changes.	

Year	Subject Property Comments	Adjoining Properties Comments	Surrounding Area Comments
1986	Parking lots have been developed on the eastern edge of the Subject Property.	No significant changes.	No significant changes.
2008 - 2011	The Cross Vermont Trail is shown on the Subject Property.	No significant changes.	No significant changes.
2014	The southeastern portion of the Subject Property is part of significant renovations to the Vermont State Hospital/Office complex. The small building formerly in the southeast corner of the Subject Property is no longer shown.	Significant renovation to the Vermont State Hospital/Office complex are underway.	No significant changes.
2018 - 2023	The renovations are complete on the southeastern portion of the Subject Property.	The renovations to the Vermont State Hospital/Office complex appear complete.	No significant changes.

5.2.4 City Directories

City directories were reviewed and are summarized in the table below. City directories are included in **Appendix H**.

City Directories Summary			
Year	Subject Property Comments	Adjoining Properties Comments	Surrounding Area Comments
1992 - 2022	The Subject Property is not listed.	Adjoining properties appear to be residential.	Surrounding area is listed as residential properties.

5.2.5 Other Land Use Records

No other land use records were reviewed as part of this Phase I ESA because adequate historical information was obtained from other sources.

5.2.6 Historical Records Review Summary

The following historical use summary has been compiled from a review of Sanborn Fire Insurance Maps, aerial photographs, topographic maps, city directories, and other historical records referenced in this section.

The earliest identified development of the Subject Property was for agricultural purposes sometime before 1942. An access road and wastewater treatment plant were developed in the southern corner of the Subject Property between 1948 and 1960. By 1986, a portion of the adjoining State Hospital/Offices complex parking lots and State Drive were developed on the southeastern edge of the Subject Property. Between 2011 and 2018, significant renovations and building demolition occurred at the complex, which included renovation of the portion of the parking lot on the Subject Property.

Besides the State Hospital/Office Complex which is present on a portion of the Subject Property and adjoining to the east, the surrounding area has been densely developed for residential use since the late 1800s.

5.3 Standard Environmental Records Review

A review of standard regulatory databases maintained by federal, state, and tribal offices was completed through EDR. The databases were searched for properties with reported environmental conditions located within approximate minimum search distances as specified by the ASTM Standard Practice. As a part of this regulatory review, other non-ASTM standard database listings reported by EDR may have also been evaluated. In these cases, this section includes a supplemental discussion of any findings and our

opinion as it relates to the identification of RECs. The detailed EDR Radius report, including the mapping of results and limitations of the search criteria, is contained in **Appendix I**.

The databases use geocoded information to identify the coordinates of the properties or to check the street addresses of practically reviewable non-geocoded orphan properties located within the same zip code. The EDR report defines acronyms that are not explicitly defined in this discussion, lists the names of all of the databases that were searched, the date information was last updated by EDR, and the date information was last updated by the original source.

Plotted locations of all database listings are not always accurate. For listings that are suspected to be inaccurate, Weston & Sampson uses the best available data when evaluating listing locations.

The table below summarizes the number of properties identified for each database. Available records for each of the identified listings were reviewed to assess the potential to impact the Subject Property. In general, releases with sources that are proximate to, and hydraulically upgradient of, the Subject Property have the greatest potential to impact it. Weston & Sampson reviewed the location of each listing to determine if it met these criteria. If one or more of the following conditions were met, the database listing may have been excluded from further consideration:

- Hydrogeologically isolated from the Subject Property (e.g., opposite bank of a river);
- At such distance that migration of contaminants to the Subject Property is unlikely (i.e. greater than 0.25-mile upgradient for hazardous substance sites and greater than 500 feet for petroleum sites); or
- Groundwater flow from the listed property is away from the Subject Property.

Those listings that were not excluded were evaluated in more detail to assess if they pose a threat. For these listings, summary tables are provided that include Weston & Sampson's opinion as to whether the Subject Property is likely to be impacted. References to VTDEC reports that were reviewed are included in Section 12.0.

The Subject Property was not identified in any databases searched by EDR.

Several database listings associated with adjoining and nearby properties were identified as requiring further review. These listings are discussed in the detail summary tables below. No other listings, including unmapped 'orphan' listings, were identified by Weston & Sampson as likely to have current or former releases with the potential to migrate to the Subject Property.

Subject Property

Site Name	D S B SOILS
Databases	LUST
Address	MAIN ST
Distance (ft.)	N/A (potentially Subject Property)
Direction	N/A (potentially Subject Property)
Elevation	N/A (potentially Subject Property)
Comments	SMS #92-1288 - This listing pertains to soils excavated from the vicinity of fuel oil USTs associated with the nearby powerhouse for the State Hospital Complex in 1993. Approximately 50 yards of soil were stockpiled and sampled for waste characterization. Several semi-volatile organic compounds (SVOCs) were present in the stockpiled soil. Impacted soils were reported to have been emplaced at "a low spot on the lawn" and covered with 24 inches of clean soil. The exact location of these materials is not known, and no record of the location was filed with local land records. Likely impacts associated with these materials, potentially emplaced on the Subject Property or nearby, represent a REC. If documentation regarding the approval of the VTDEC for emplacement on the Subject Property can be identified, this would be considered a Controlled Recognized Environmental Condition (CREC) instead.

Site Name	VILLAGE GARAGE
Databases	LUST, VAPOR
Address	RT 2, MAIN ST
Distance (ft.)	Adjoining Subject Property
Direction	Northeast
Elevation	Higher
Comments	SMS #87-0109 - This listing is mapped as 522 feet away, however, impacts associated with this release historically adjoined the Subject Property. The release was identified when a loss of 2,200 gallons of gasoline was recorded from a UST at the Village of Waterbury maintenance garage. Shortly after, gasoline odors were observed within houses in the vicinity of the release and the Subject Property. Environmental response activities included

Comments	the removal of the leaking tank and implementation of a recovery well, carbon filtration systems, blowers, and long-term monitoring of groundwater and indoor air. Following monitoring from 1987 through 2009, SMS #87-0109 was recommended for regulatory closure. Monitoring well MW-9, located along the Subject Property boundary, reported no detectable contaminants in 2009. However, the laboratory reporting limits at that time exceeded current Vermont Groundwater Enforcement Standards (VGES) for several analytes. Given the lower concentration thresholds under current VGES and the documented extent of the plume onto the Subject Property, contamination above current regulatory standards is considered likely and this condition is identified as a Recognized Environmental Condition (REC).
-----------------	--

Site Name	FLANDERS RESIDENCE
Databases	LUST, UST
Address	21 ELM ST
Distance (ft.)	Adjoining Subject Property
Direction	North-Northeast
Elevation	Higher
Comments	SMS #: 2002-2958 - This listing pertains to contamination found during the closure of a 550-gallon fuel oil underground storage tank. PID readings in soil samples under and around the UST ranged from 2.5 to 15 parts per million. In 2002, four groundwater monitoring wells were installed to evaluate contamination related to the UST. Two of the four groundwater monitoring wells were sampled and there were no detections above the Vermont Groundwater Enforcement Standards. In 2003 the site was assigned a Site Management Activities Completed (SMAC) designation. Although SMS #2002-2958 has achieved regulatory closure, groundwater downgradient from the UST (towards the Subject Property) was not assessed and residual soil contamination remains in situ. The Subject Property is downgradient and adjacent to this release. Therefore, likely impacts to the Subject Property associated with SMS #2002-2958 represent a REC.

Site Name	FINUCANE RESIDENCE
Databases	UST
Address	36 RANDALL STREET
Distance (ft.)	173
Direction	East-Northeast
Elevation	Higher
Comments	This listing pertains to the removal of a 1,000-gallon #2 or #4 fuel oil UST in 2005. The tank was reported in good condition. No other information is available. This property has no reported spills or releases. Based on the fuel type (#2 or #4 fuel oil) and distance to the Subject Property, it is unlikely that environmental media at the Subject Property have been impacted by a release from this UST.

Site Name	RANDALL STREET EASEMENT
Databases	UST
Address	22 RANDALL STREET
Distance (ft.)	223
Direction	East-Northeast
Elevation	Higher
Comments	This listing pertains to the removal of a 1,000-gallon #2 or #4 fuel oil UST in 2009. This UST was noted to be in poor condition upon removal and was installed in 1924. Potential environmental impacts were not assessed and the Subject Property is downgradient of likely groundwater flows in the vicinity. As this tank referred to in this listing was in use for a significant amount of time (85-years) and noted to be in poor condition, potential releases from this UST are considered likely to have impacted environmental media at the Subject Property and represent a REC.

Site Name	VT ANR DEC RA ENVIRONMENTAL LAB
Databases	INST CONTROL, SHWS, TIER 2, SPILLS, VT MANIFEST, FINDS, ECHO, RCRA NonGen / NLR
Address	103 SOUTH MAIN
Distance (ft.)	Appx. 250
Direction	Southeast
Elevation	Higher
Comments	<p>Impacted soils containing PAHs and metals associated with Urban Fill were identified near the former powerhouse of the State Hospital/Offices complex and tracked under SMS #2014-4543. Weston & Sampson requested documentation from the VTDEC for a number of releases that occurred at the State Hospital/Offices complex and are associated with these listings. See Section 5.5 for additional discussion of response actions associated with these releases.</p> <p>Note that while these listings are noted to be over 500-feet to the east of the Subject Property in the database reports, this is incorrectly geolocated. Some listings (including SMS# 2014-4543) are actually located within 250-feet from the Subject Property.</p>

Site Name	CC WARREN HOUSE
Databases	UST, UST FINDER
Address	87 SOUTH MAIN STREET
Distance (ft.)	375
Direction	East
Elevation	Higher
Comments	<p>This listing pertains to a UST formerly located northeast of the Subject Property at a historical residential building built circa 1880. The UST was removed in 2004 and was noted to be in fair condition upon removal. No other information was available. Based on its use at a residential building, the UST likely held heating oil. Based on the condition of the UST, the distance to the Subject Property, and the likely fuel type (heating oil), potential releases from this UST are not considered likely to have impacted environmental media at the Subject Property.</p>

Site Name	WATERBURY CONGREGATIONAL CHURCH
Databases	E MANIFEST, RCRA NonGen / NLR, UST
Address	8 NORTH MAIN STREET
Distance (ft.)	389
Direction	North-Northeast
Elevation	Higher
Comments	<p>This listing pertains to the removal of a 1,000-gallon #2 or #4 fuel oil UST. The tank was removed in 2018 and was noted to be in good condition upon removal. No other information is available. Based on the distance to the Subject Property, the fuel type (#2 or #4 fuel oil), and the lack of reported spills or releases, it is considered unlikely that a release from this UST has impacted environmental media at the Subject Property.</p>

Site Name	GMP WINOOSKI STREET SUBSTATION
Databases	SHWS
Address	WINOOSKI STREET
Distance (ft.)	450
Direction	Northwest
Elevation	Lower
Comments	<p>SMS #2014-4520 - This listing pertains to environmental impacts associated with a decommissioned Green Mountain Power Substation. Arsenic, chromium and petroleum compounds were detected in shallow soil, and low levels of PCBs were detected in one concrete sample. Groundwater was not assessed. Based on the location of this Site (crossgradient of groundwater flows in relation to the Subject Property), its distance from the Subject Property (450 feet), and the contaminant types (PCBs, metals, and petroleum in shallow soil), it is considered unlikely that this release has impacted environmental media at the Subject Property.</p>

Site Name	VSECU WATERBURY BRANCH
Databases	AST
Address	27 SOUTH MAIN STREET
Distance (ft.)	466
Direction	Northeast
Elevation	Higher
Comments	This listing pertains to multiple ASTs containing propane. Propane is a non-toxic, non-persistent gas that generally does not pose a significant risk of soil or groundwater contamination in the event of a release. Any potential releases are considered unlikely to impact environmental media at the Subject Property.

Site Name	NORTHFIELD SAVINGS BANK
Databases	UST FINDER RELEASE, SPILLS, LUST, UST
Address	29 SOUTH MAIN ST
Distance (ft.)	467
Direction	Northeast
Elevation	Higher
Comments	SMS # 2011-4231 - This listing pertains to contamination related to a leaking 550-gallon fuel oil UST. Extensive groundwater monitoring conducted over the last 15-years confirms that impacts are limited to the immediate vicinity of the former UST and have not migrated off-site. Based on the distance from the Subject Property and the nature of documented impacts, it is considered unlikely that a release from this UST has impacted environmental media at the Subject Property.

Site Name	LARKIN BUILDING
Databases	LUST, UST, UST FINDER
Address	3 SOUTH MAIN ST
Distance (ft.)	468
Direction	North-Northeast
Elevation	Higher
Comments	SMS #2013-4474 - This listing pertains to the removal of 1,000- and 750-gallon fuel oil USTs. The USTs appeared to be in fair condition with no visible holes. Groundwater was not encountered during removal; however, residual petroleum impacts were noted to remain in soil in the vicinity of the former USTs. In May 2014, the listing was closed with a SMAC designation. Based on its distance to the Subject Property (468 feet) and the fuel type (heating fuel), it is considered unlikely that the release from this UST has impacted environmental media at the Subject Property.

Site Name	51 SOUTH MAIN STREET PROPERTY
Databases	BROWNFIELDS, SPILLS, SHWS, ASBESTOS
Address	51 SOUTH MAIN STREET
Distance (ft.)	476
Direction	Northeast
Elevation	Higher
Comments	<p>SMS #2023-5300 - Concentrations of chlorinated volatile organic compounds (VOCs), including trichloroethene (TCE) and tetrachloroethene (PCE), were observed in groundwater and soil gas exceeding regulatory standards. PAHs and arsenic were observed in shallow soils exceeding regulatory standards. Impacts were associated with an adjacent automotive repair facility and emplaced urban fill, respectively. The extent of impacted groundwater or soil gas has not been determined. Based on the contaminant type (chlorinated VOCs), the location of the Site upgradient from the Subject Property, and the distance to the Subject Property, this release is considered likely to have impacted environmental media at the Subject Property.</p> <p>2011WMD514 - This listing pertains to a spill of 200- to 500-gallons of fuel oil released from ASTs located in the basement of 51 South Main Street during Tropical Storm Irene in 2011. A vacuum truck was used to remove oil floating on water within the basement. After floodwaters receded, two cubic yards of soil were removed from a dirt floor section of the</p>

Comments	<p>basement. The spill achieved regulatory closure in 2012 and the building has since been demolished. No petroleum-related compounds have been detected in groundwater. Based on the lack of impacts observed in groundwater and the type of fuel released (#2 or #4 fuel oil), it is considered unlikely that environmental media at the Subject Property have been impacted by this spill.</p> <p>This listing also pertains to the removal of 88 linear feet of asbestos-containing material (ACM) in 2018. The building from which the ACM was removed has since been demolished. Asbestos formerly contained within a historical structure that was not located on the Subject Property is not likely to affect environmental conditions at the Subject Property.</p>
-----------------	---

Site Name	WATERBURY AREA FOOD SHELF
Databases	EDR Hist Auto
Address	57 S MAIN ST STE 2
Distance (ft.)	504
Direction	East-Northeast
Elevation	Higher
Comments	<p>This is the location of a former automotive service station. Historical automotive facilities are commonly associated with releases of environmental contaminants, including chlorinated VOCs. At least five automotive repair facilities have historically operated within 700 feet upgradient of the Subject Property and were identified in the database search, including this one, Eddie's Gulf Service at the corner of North Main and Stowe Street, Joe's Service Station at 26 South Main Street, and two unnamed historical automotive service stations at 49 and 80 South Main Street. Collectively, potential releases from these facilities are considered a REC for the Subject Property.</p>

5.4 Local Records

Weston & Sampson made records requests with various Waterbury offices, including the Clerk's Department, and reviewed Tax Assessors' records. Records requests were made on September 24, 2025. Pertinent findings are summarized in the following subsections. Copies of relevant documents reviewed are provided in **Appendix J**.

5.4.1 Tax Assessor

Weston & Sampson performed a file review with the Waterbury Assessors' Office on September 24, 2025. Copies of any relevant records obtained are included in **Appendix J**.

5.4.2 Fire Department

Weston & Sampson interviewed Mr. Gary Dillon, Chief Engineer with the Waterbury Volunteer Fire Department about the use of firefighting foam at the nearby Fire Station. Mr. Dillon reported the following pertinent information:

- The Waterbury Volunteer Fire Department uses Class A firefighting foam, which is stored on a firefighting vehicle.
- Aqueous film-forming foam (AFFF) has not been used by the fire department.

According to the Interstate Technology Regulatory Council (ITRC), Class A firefighting foams are, "hydrocarbon-based surfactants, do not contain intentionally added [per- and polyfluoroalkyl substances (PFAS)], and are appropriate to use for their intended purpose." Therefore, the use of Class A foams by the nearby Waterbury Volunteer Fire Department does not represent a REC.

5.4.3 Health Services Department

The Town of Waterbury does not have a Health Services Department. Weston & Sampson searched available state records, including various VT ANR databases, in the absence of local records relevant to environmental conditions at the Subject Property, including the storage and/or use of petroleum products and hazardous substances. No pertinent information was identified.

5.4.4 Inspectional Services Department

The Town of Waterbury does not have an Inspectional Services Department. Weston & Sampson searched available state records, including various VT ANR databases, in the absence of local records. No relevant information concerning the identification of RECs was identified.

5.4.5 Electric Utility

Weston & Sampson observed one pole-mounted transformer with a "NO PCB" sticker on the Subject Property during field reconnaissance. No evidence of a release from this transformer was observed. Weston & Sampson did not attempt to contact the local power utility as documented releases from this transformer would have been identified in the Vermont Hazardous Sites database.

5.5 Other Environmental Records

Weston & Sampson may consult other environmental records, if necessary, to develop the regulatory history of the Subject Property and the surrounding area. In some cases, other records are reviewed to understand the specific nature of certain database listings. For this Phase I ESA, Weston & Sampson requested documentation from the State of Vermont for several releases and/or spills that occurred at the adjoining State Hospital/Offices complex.

SMS #2014-4543 & WMD2014-419

Impacted soils containing PAHs and metals associated with Urban Fill were identified near the former powerhouse and within a flood-control berm along the Winooski River. The berm continues onto the Subject Property. These impacts were discovered during construction and earthwork activities. This listing has not achieved regulatory closure. It is likely that similar impacts are present in the section of the berm located on the Subject Property, and this is considered a REC.

The following releases and/or spills have occurred at the adjoining State Hospital/Offices complex, but were either small or are at such a distance that they are considered unlikely to have impacted environmental media at the Subject Property.

2014WMD397

Petroleum-related contamination was identified during excavation for a telecommunications vault near the former "grounds shop" at the State Hospital/Offices complex.

1979 Fuel Oil Spill

Approximately 250 gallons of #6 fuel oil were spilled at the complex in 1979 during an overfill event and the spill was addressed with no further assessment required.

2009WMD055

A release of 1,200 gallons of #6 fuel oil occurred at the former powerhouse (roughly 250 feet cross-gradient of the Subject Property) when tank fill and vent lines were confused. Impacted soils and oils were removed and disposed of off-site.

2011WMD617

A spill of 200—300 gallons of propylene glycol occurred during Tropical Storm Irene. Impacted soils were excavated and transported off-site for disposal.

2011WMD641

A release of hydraulic oil occurred during Tropical Storm Irene; no further information is available.

2002WMD054

A release of 200 gallons of #6 fuel oil occurred at the former powerhouse (roughly 250 feet cross-gradient of the Subject Property) due to UST overfilling.

1998WMD173

Waste oil and impacted absorbent pads were discovered in a catch basin in the parking lot of the Weeks Building, approximately 500 feet from the Subject Property.

2011WMD741

Displaced propane and acetylene tanks were identified during Tropical Storm Irene response activities. The tanks were removed, and no related environmental impacts were noted.

2011WMD863

Approximately 600 gallons of propylene glycol were released to underground piping at the Agricultural Building.

A historical utility plan was also provided, identifying a structure formerly located on the Subject Property as a wastewater treatment plant. That plan is included in **Appendix K**.

6.0 INTERVIEWS

To the extent practicable, Weston & Sampson interviews individuals with knowledge of current and past operations at the Subject Property. For this Phase I ESA, Weston & Sampson conducted interviews with a representative of the current owner and a representative of the prospective purchaser. Interviews were performed via a written questionnaire. Questions were focused on information that would lead to the identification of RECs in connection with the Subject Property. Pertinent information garnered during the interviews is summarized in the following subsections.

6.1 Current Owner

Ms. Wanda Minoli, Commissioner of the State of Vermont Department of Buildings and General Services, was interviewed regarding the current and former use of the Subject Property. No findings pertinent to the identification of RECs were reported.

6.2 Key Site Manager

No Key Site Manager was identified for the purposes of this report.

6.3 Current Occupants

The Subject Property is vacant and has no occupants.

6.4 Current Operators

The State of Vermont currently operates the Subject Property. Pertinent interview responses are summarized in Section 6.1.

6.5 Past Owners

Past owners were not interviewed during this Phase I ESA because they were not identified by the current Owner.

6.6 Local Government Officials

Weston & Sampson interviewed no local government officials because Waterbury department officials were deemed not likely to have a direct working knowledge of past operations at the Subject Property. For this reason, records requests were made to several Waterbury departments. The intent of these file reviews is to procure information that might aid in the identification of RECs that might exist on the Subject Property. Pertinent information garnered from the local file reviews is summarized in Section 5.4.

6.7 Other Individuals

Other individuals were not interviewed during this Phase I ESA because they were deemed not likely to have a direct working knowledge of past operations at the Subject Property.

7.0 OTHER ENVIRONMENTAL CONSIDERATIONS

This section is reserved for a discussion of asbestos-containing materials (ACM), lead-based paint (LBP), and polychlorinated biphenyls (PCBs) in building materials. The project scope did not include the identification of these building materials.

8.0 DATA GAPS

A data gap is a lack of, or inability to obtain, required information despite good faith efforts by the Environmental Professional. Significant data gaps are data gaps that affect the ability of the Environmental Professional to identify recognized environmental conditions. The following data gaps were identified:

- Data failure was encountered during the historical use source review related to the 5-year interval requirement.
- The historical use review did not identify Subject Property use back to the date of the original development of the Subject Property.
- Past owners and occupants were not interviewed during this Phase I ESA.

It is Weston & Sampson's opinion that these data gaps do not represent significant data gaps because other information was able to be developed to suggest the nature of original Subject Property use and to define the continuity of use.

9.0 FINDINGS AND OPINIONS

A summary of relevant environmental findings, along with Weston & Sampson's professional opinions, are provided below:

- The earliest identified development was for agricultural use before 1942. Between 1948 and 1960, an access road and wastewater treatment plant were constructed in the southern portion. By 1986, portions of the adjoining State Hospital/Offices complex parking lots and State Drive extended onto the southeastern edge. In 2015, the parking lot was reconstructed during major renovations and demolition at the complex. Aside from the complex, the surrounding area has been densely developed for residential use since the late 1800s.
- PAHs and metals were identified in a soil berm extending onto the Subject Property from the State Hospital powerhouse. Similar impacts are likely present on the Subject Property and represent a REC.
- In 1993, approximately 50 yards of impacted soil from the removal of fuel oil USTs at the State Hospital/Office Complex were stockpiled, tested, and emplaced beneath clean soil cover. The exact location is unknown and may include the Subject Property. This represents a REC unless documentation confirms its location and VTDEC approval, in which case it would be considered a CREC.
- A 1987 release of 2,200 gallons of gasoline at the Village of Waterbury garage, less than 500 feet upgradient of the Subject Property, impacted groundwater and indoor air. The boundary monitoring well, located on the edge of the Subject Property, showed no detections in 2009, though reporting limits exceeded current VGES. Given lower current standards and documented plume migration, likely groundwater impacts are considered a REC.
- During the 2002 closure of a 550-gallon fuel oil UST at the adjoining 21 Elm Street property, soil contamination was identified. No groundwater exceedances were reported, but groundwater downgradient of the UST was not assessed. Potential migration of impacted groundwater is considered a REC.
- A 2009 closure of a 1,000-gallon UST, 200 feet upgradient of the Subject Property at 22 Randall Street, listed the UST in poor condition. A release is considered likely and represents a REC.
- In 2023, chlorinated VOCs were identified in groundwater and soil gas at 51 South Main Street, roughly 500 feet upgradient of the Subject Property. The extent is undefined and likely extends to the Subject Property. This release is considered a REC.
- At least five automotive repair facilities have historically operated within 700 feet upgradient of the Subject Property. Automotive facilities are commonly associated with releases of contaminants, including chlorinated VOCs. Likely releases from these facilities are considered a REC.
- The Subject Property is located within a VTDEC-designated Urban Background Area, where arsenic, lead, and PAHs are common in subsurface soils unrelated to specific releases. An investigation recently conducted at the Subject Property confirmed the presence of PAH impacts below the Urban Background value. Such impacts represent a BER that would require management during redevelopment.
- No significant data gaps have been identified for this ESA.

10.0 CONCLUSIONS

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of the ASTM Standard Practice of Randall Meadow located in Waterbury, Vermont. Any exceptions to, deletions from, this practice are described in Section 1.0. The assessment has revealed no evidence of recognized environmental conditions in connection with the Subject Property except for the following:

- Likely impacts associated with:
 - The soil berm located on the Subject Property.
 - Impacted soil from nearby fuel oil USTs that was emplaced on the Subject Property or nearby.
 - The 1987 release of gasoline at the upgradient Village of Waterbury Garage.
 - The leaking UST at the adjoining and upgradient 21 Elm Street property.
 - The former UST in poor condition at the upgradient 22 Randall Street property.
 - Chlorinated VOCs in groundwater and soil gas identified at the upgradient 51 South Main Street.
 - Potential releases from five upgradient historical automotive repair facilities within 700 feet.

In addition to the RECs listed above, Weston & Sampson identified soil impacts related to the Subject Property's location in a VTDEC-designated Urban Background Area, and a recent investigation confirmed the presence of PAHs below the Urban Background value. These impacts represent a BER.

No Significant Data Gaps were identified as part of this Phase I ESA.

It is Weston & Sampson's opinion that additional investigation is warranted at the Subject Property.

11.0 SIGNATURES OF THE ENVIRONMENTAL PROFESSIONAL

This ESA was overseen by [a] Qualified Environmental Professional[s] as defined in the ASTM Standard Practice, CERCLA, and the EPA AAI Final Rule. Qualifications for the Environmental Professional[s] are included in **Appendix L**.

Environmental Professional Statement

[I/We] declare that, to the best of [my/our] professional knowledge and belief, [I/We] meet the definition of Environmental Professional as defined in § 312.10 of 40 CFR § 312. [I/We] have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. [I/We] have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR § 312.

Scope of Work

Phase I ESA User Responsibilities

The following user responsibilities must be completed for the work to be considered compliant:

1. Reviewing title and judicial records for environmental liens, or activity and use limitations (AULs).
2. Provide any specialized knowledge or experience that is material to RECs associated with the Subject Property.
3. Provide any actual knowledge of any environmental liens or other encumbrances for the Subject Property.
4. Provide any reasons for a significantly lower purchase price if the Subject Property is involved in a transaction for purchase or sale.
5. Provide any commonly known or reasonably ascertainable information within the local community about the Subject Property.
6. Provide information to the environmental professional why the Phase I ESA is being conducted. If the user does not identify the purpose(s) of the Phase I ESAs, the environmental professional will assume the purpose is to qualify innocent landowner liability protection under CERCLA and will state this in the report.

We will provide you with a user questionnaire that will assist will completing these responsibilities. While you are responsible for reviewing title and judicial records (item #1 above), which typically falls to the responsibility of a title search company, Weston & Sampson can have this completed for an additional cost of \$[REDACTED]

The following elements will be included in the proposed ASTM E 1527-21 compliant Phase I ESA:

Agency File Reviews and Historical Records Review

The purpose of the records review is to obtain and review reasonably ascertainable records that will help identify recognized environmental conditions in connection with the Subject Property. At a minimum the following standard state and federal environmental record sources will be reviewed and may be available from both government sources and/or third-party vendors specializing in record retrieval: Federal NPL Site List 1.0 mile; Federal CERCLIS List 0.5 mile; Federal RCRA TSD Facilities List 1.0 mile; Federal RCRA Generators List Subject Property and Adjoining Properties; Federal ERNS List Subject (site only); State Leaking UST Sites 0.5 miles; State Registered UST Sites (site and adjoining properties)

Other state agency files will be reviewed to determine the history of use and regulatory status of the Subject Property and of adjoining properties may have the potential to impact the Subject Property. Weston & Sampson may check additional state and local sources to supplement federal and state sources identified above.

Historical sources will be reviewed to ascertain the previous uses or occupancies of the Subject Property and surrounding area and to identify those uses or occupancies that are likely to have led to recognized environmental conditions in connection with the Subject Property. The historical records reviewed generally include at least three of the following (where available) sources:

- | | |
|-------------------------------------|---|
| ✓ Title Records | <input type="checkbox"/> Historical Fire Insurance Maps |
| ✓ Aerial Photographs | <input type="checkbox"/> Fire Department Records |
| ✓ USGS Topographic Maps | <input type="checkbox"/> Historical Tax Records |
| ✓ Historical City Directory Records | <input type="checkbox"/> Historical Topographic Maps |
| ✓ Prior Env. Assessment Reports | |

Site Reconnaissance

The site reconnaissance will be performed to identify recognized environmental conditions in connection with the Subject Property. To accomplish this objective, visual and physical observations (i.e. noxious or foul odors) will be noted while observing the exterior of the Subject Property and all structures on the site. Observations will also be made in all accessible interior areas of any site structures.

Weston & Sampson will also note the current use(s) of the Subject Property during the site reconnaissance. Visual or physical indications of past uses of the Subject Property that were likely to involve the use, treatment, storage, disposal, or generation of hazardous substances or petroleum products will be described to the extent that this information is noted. Current of adjoining properties will also be described. The observable geologic, hydrogeologic, and topographic conditions on-site and surrounding the site will be described.

During the site reconnaissance, Weston & Sampson will note the presence and/or absence (where applicable) of the following important site conditions:

- | | | |
|------------------|--------------------|---|
| ➤ Storage tanks | ➤ Drains and sumps | ➤ Pits, ponds, lagoons |
| ➤ Noxious Odors | ➤ Pools of liquid | ➤ Stressed vegetation |
| ➤ Drums | ➤ Solid waste | ➤ Stained soil or pavement |
| ➤ Septic systems | ➤ Monitor Wells | ➤ Identified and/or unidentified substance containers |
| ➤ Wastewater | ➤ Heating source | |

Interviews

As required by ASTM E 1527-21, Weston & Sampson will conduct interviews with current and past owners and occupants and the individual identified as the Key Site Manager of the Site. The goal of these interviews will be to obtain information concerning the potential for recognized environmental conditions in connection with the site. As such, interviews will focus on obtaining information about current and/or past uses and conditions noted during the site reconnaissance. We will also ask questions to determine if prior environmental documents exist and if any environmental related threatened, pending, or past litigation, administrative actions, or notices of violation exist relevant to hazardous substances or petroleum products in, on, or from the Subject Property. Reasonable attempts will be made to interview the owners of the site, a representative any site occupants, and/or key site managers.

Interviews with local government officials will also be conducted to obtain information associated with potential RECs in connection with the Subject Property. Reasonable attempts will be made to interview a staff member of the following types of local government agencies: fire department, health agencies, and/or local/regional office of state agency having jurisdiction over hazardous waste disposal or other environmental matters in the area in which the Subject Property are located.

Phase I ESA Report

Weston & Sampson's Phase I ESA report will document the observations made and work completed. The report will be devised such that we clearly detail our findings and opinions. Conclusions will focus on the likely presence or absence of recognized environmental conditions in connection with the site. The report will include the environmental professional's opinion of the potential impact of recognized generally follow the recommended format environmental conditions detailed in ASTM E 1527-21. If the assessment reveals no evidence of recognized environmental conditions, then a statement to this effect would be made in the report.

Appendix C:
Questionnaires / Checklists

Phase I ESA User Questionnaire

For the Subject Property:

Randall Meadow, Randall Street, Waterbury, Vermont

To qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "*Brownfields Amendments*"), the *user* must conduct the following inquiries required by 40 C.F.R. §§ 312.25, 312.28, 312.29, 312.30, and 312.31. These inquiries must also be conducted by EPA Brownfield Assessment and Characterization grantees. The *user* should provide the following information to the *environmental professional*. Failure to conduct these inquiries could result in a determination that "*all appropriate inquiries*" is not complete.

(1.) Environmental liens that are filed or recorded against the *subject property* (40 C.F.R. § 312.25).

Did a search of *land title records* (or judicial records where appropriate, see Note 1) identify any *environmental liens* filed or recorded against the *subject property* under federal, tribal, state, or local law?

YES NO

Notes: _____

(2.) Activity and use limitations (AULs) that are in place on the *subject property* or that have been filed or recorded against the *subject property*.

Did a search of *land title records* (or judicial records where appropriate, see Note 1) identify any *AULs*, such as *engineering controls*, land use restrictions or *institutional controls* that are in place at the *subject property* and/or have been filed or recorded against the *subject property* under federal, tribal, state or local law?

YES NO

Notes: _____

(3.) Specialized knowledge or experience of the person seeking to qualify for the *LLP* (40 C.F.R. § 312.28).

Do you have any specialized knowledge or experience related to the *subject property* or nearby *properties*? For example, are you involved in the same line of business as the current or former *occupants* of the *subject property* or an *adjoining property* so that you would have specialized knowledge of the chemicals and processes used by this type of business?

YES NO

Notes: _____

(4.) Relationship of the purchase price to the fair market value of the *subject property* if it were not contaminated (40 C.F.R. § 312.29).

Does the purchase price being paid for this *subject property* reasonably reflect the fair market value of the *property*?

YES NO N/A

If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the *subject property*?

YES NO N/A

Notes: _____

NOTE 1 - In certain jurisdictions, federal, tribal, state, or local statutes, or regulations specify that *environmental liens* and *AULs* be filed in judicial records rather than in *land title records*. In such cases judicial records shall be searched for *environmental liens* and *AULs*.

Phase I ESA User Questionnaire

For the Subject Property:

(5.) Commonly known or *reasonably ascertainable* information about the *subject property* (40 C.F.R. § 312.30).

Are you aware of commonly known or *reasonably ascertainable* information about the *subject property* that would help the *environmental professional* to identify conditions indicative of *releases* or threatened *releases*?

YES NO

Notes: soil samples by Ross Environmental

Do you know the past uses of the *subject property*?

YES NO

Notes: To a point, property has been agricultural in recent memory

Do you know of specific chemicals that are present or once were present at the *subject property*?

YES NO

Notes: _____

Do you know of spills or other chemical *releases* that have taken place at the *subject property*?

YES NO

Notes: _____

Do you know of any environmental cleanups that have taken place at the *subject property*?

YES NO

Notes: _____

Phase I ESA User Questionnaire

For the Subject Property:

(6.) The degree of obviousness of the presence or likely presence of contamination at the *subject property*, and the ability to detect the contamination by appropriate investigation (40 C.F.R. § 312.31).

Based on your knowledge and experience related to the *subject property*, are there any *obvious* indicators that point to the presence or likely presence of *releases* at the *subject property*?

YES

NO

Question	Owner/Property Representative Response		
Is the property used for an industrial use?	YES	NO	<input checked="" type="radio"/> UNK
Is any <i>adjoining</i> property used for an industrial use?	YES	<input checked="" type="radio"/> NO	UNK
Did you observe evidence or do you have any prior knowledge that the property has been used for an industrial use in the past?	YES	<input checked="" type="radio"/> NO	UNK
Did you observe evidence or do you have any prior knowledge that any <i>adjoining</i> property has been used for an industrial use in the past?	YES	NO	<input checked="" type="radio"/> UNK
Is the property used as a gasoline station, motor repair facility, commercial printing facility, dry cleaner, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility (if applicable, identify which)?	YES	<input checked="" type="radio"/> NO	UNK

Is any *adjoining* property used as a gasoline station, motor repair facility, commercial printing facility, dry cleaner, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility (if applicable, identify which)?

YES NO UNK

Did you observe evidence or do you have any prior knowledge that the property has been used as a gasoline station, motor repair facility, commercial printing facility, dry cleaner, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility (if applicable, identify which)?

YES NO UNK

Did you observe evidence or do you have any prior knowledge that any *adjoining* property has been used as a gasoline station, motor repair facility, commercial printing facility, dry cleaner, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility (if applicable, identify which)?

YES NO UNK

Are there currently any damaged or discarded automotive or industrial batteries, pesticides, paints, or other chemicals in individual containers of >5 gallons (19 Q) in volume or 50 gallons (190 Q) in the aggregate, stored on or used at the property or at the facility?

YES NO UNK

Did you observe evidence or do you have any prior knowledge that there have previously been any damaged or discarded automotive or industrial batteries, or pesticides, paints, or other chemicals in individual containers of >5 gallons (19 L) in volume or 50 gallons (19 L) in the aggregate, stored on or used at the property or at the facility?

YES NO UNK

Are there currently any industrial drums (typically 55 gallons (208 Q)) or sacks of chemicals located on the property or at the facility?

YES NO UNK

Did you observe evidence or do you have any prior knowledge that there have previously been any industrial drums (typically 55 gallons (208 L)) or sacks of chemicals located on the property or at the facility?

YES NO UNK

Did you observe evidence or do you have any prior knowledge that fill dirt has been brought onto the property that originated from a contaminated site?

YES NO UNK

Did you observe evidence or do you have any prior knowledge that fill dirt has been brought onto the property that is of an unknown origin?

YES NO UNK

Are there currently any pits, ponds, or lagoons located on the property in connection with waste treatment or waste disposal?

YES NO UNK

Did you observe evidence or do you have any prior knowledge that there have previously been any pits, ponds, or lagoons located on the property in connection with waste treatment or waste disposal?

YES NO UNK

Is there currently any stained soil on the Property?

YES NO UNK

Did you observe evidence or do you have any prior knowledge that there has previously been any stained soil on the property?

YES NO UNK

Are there currently any registered or unregistered storage tanks (above or underground) located on the property?

YES NO UNK

Did you observe evidence or do you have any prior knowledge that there have previously been any registered or unregistered storage tanks (above or underground) located on the property?

YES NO UNK

Are there currently any vent pipes, fill pipes, or access ways indicating a fill pipe protruding from or adjacent to any structure located on the property?

YES NO UNK

Did you observe evidence or do you have any prior knowledge that there have previously been any vent pipes, fill pipes, or access ways indicating a fill pipe protruding from the ground on the property or adjacent to any structure located on the property?

YES NO UNK

Is there currently evidence of leaks, spills, or staining by substances other than water, or foul odor, associated with any flooring, drains, walls, ceilings, or exposed grounds on the property?

YES NO UNK

Did you observe evidence or do you have any prior knowledge that there have previously been any leaks, spills, or staining by substances other than water, or foul odors, associated with any flooring, drains, walls, ceilings, or exposed grounds on the property?

YES NO UNK

If the property is served by a private well or non-public water system, is there evidence or do you have any prior knowledge that contaminants have been identified in the well or system that exceeded guidelines applicable to the water system?

YES NO UNK

If the property is served by a private well or non-public water system, is there evidence or do you have prior knowledge that the well has been designated as contaminated by any government environmental/health agency?

YES NO UNK

Does the owner or occupant of the property have any knowledge of environmental liens or governmental notification related to past or recurrent violations of environmental laws with respect to the property or any facility located on the property?

YES NO UNK

Has the owner or occupant of the property been informed of the past existence of hazardous substances or petroleum products with respect to the property or any facility located on the property?

YES NO UNK

Has the owner or occupant of the facility been informed of the current existence of hazardous substance or petroleum products with respect to the property or any facility located on the property?

YES NO UNK

Has the owner or occupant of the property been informed of the past existence of environmental violations with respect to the property or any facility located on the property?

YES NO UNK

Has the owner or occupant of the property been informed of the current existence of environmental violations with respect to the property or any facility located on the property?

YES NO UNK

Does the owner or occupant of the property have any knowledge of any environmental site assessment of the property or facility that indicated the presence of hazardous substances or petroleum products on, or contamination of, the property, or recommended further assessment of the property?

YES NO UNK

Does the owner or occupant of the property know of any past, threatened, or pending lawsuits or administrative proceedings concerning a release or threatened release of any hazardous substance or petroleum products involving the property by any owner or occupant of the property?

YES NO UNK

Does the property discharge wastewater (not including sanitary waste or stormwater) onto or adjacent to the property and/or into a stormwater system?

YES NO UNK

Does the property discharge wastewater (not including sanitary waste or stormwater) onto or adjacent to the property and/or into a sanitary sewer system?

YES NO UNK

Did you observe evidence or do you have any prior knowledge that any hazardous substances or petroleum products, unidentified waste materials, tires, automotive or industrial batteries, or any other waste materials have been dumped above grade, buried, and/or burned on the property?

YES NO UNK

Is there a transformer, capacitor, or any hydraulic equipment for which there are any records indicating the presence of PCBs?

YES NO UNK

User-Provided Documents

10 June 2025

Mr. Bill Woodruff
Waterbury Public Works Director
28 N Main St #1
Waterbury, VT 05676
bwoodruff@waterburyvt.com

**RE: Soil Sampling & Analysis
Randall Meadow Cornfield, Waterbury, VT**

Dear Mr. Woodruff:

Ross Environmental Associates Inc. (R.E.A.) collected nine soil samples for laboratory testing from the Randall Meadow Cornfield property which is located between the Winooski River and Randall Street in Waterbury, Vermont (**Figures 1 & 2, Attachment A**). The work was completed as outlined in the work plan dated 21 April 2025. All of the work was completed in accordance with state guidelines following current industry standards. The laboratory results were compared to the Vermont Soil Standards included in Appendix A of the **INVESTIGATION AND REMEDIATION OF CONTAMINATED PROPERTIES RULE**, February 2024

Findings & Conclusions

A summary of the findings from this sampling event are outlined below:

- Benzo(a)pyrene was detected in several soil samples at concentrations above the VT residential soil standard but below the non-residential standard. Low concentrations of several other polycyclic aromatic hydrocarbons (PAHs) were also detected in each sample, but at concentrations below the corresponding residential and non-residential soil standards.
- Perfluorooctane-sulfonic acid (PFOS) was detected in six of the nine samples at concentrations between 0.22 and 0.47 nanograms per kilogram (ng/Kg), which are below the current Vermont soil standard. No other PFAS were detected in any of the soil samples.
- Several of the RCRA 8 metals were detected in the soil samples, but at concentrations below the corresponding residential and non-residential soil standards.

Based on the enclosed test results, the soil in the Randall Meadow Cornfield may need special handling due to the presence of PAHs (specifically benzo(a)pyrene), RCRA 8 metals and PFAS. These constituents are often associated with manure and septic sludge, which have reportedly been applied to the cornfield. Due to the exceedance of the VT residential soil standard for benzo(a)pyrene, the VT DEC should be notified of the findings.

Soil Sampling and Analysis

On 8 May 2025, **R.E.A.** collected nine soil samples from the area of the proposed floodplain restoration in the Randall Meadow Cornfield. The samples were collected approximately six to eight inches below ground surface using a hand trowel. The soil samples were also screened for the possible presence of volatile organic compounds (VOCs) using a PID. PID readings on all of the soil samples were 0.0 parts per million (ppm).

None of the Vermont Soil Standards for PAHs, RCRA 8 metals or PFAS were exceeded in any of the soil samples collected from the area of the proposed floodplain restoration, except for benzo(a)pyrene which was detected above the residential soil standard in the S-1, S-2, S-3, S-4, S-6, and S-7 samples. Low concentrations of several other PAHs were also detected in each sample. PFOS was detected in the S-1, S-3, S-4, S-5, S-6, and S-9 samples at concentrations between 0.22 and 0.47 ng/Kg, which are below the current Vermont soil standard. No other PFAS were detected in any of the soil samples.

Barium, chromium, and lead were detected in all of the soil samples at concentrations between 11 and 54 mg/Kg, which is below the corresponding VT soil standards. Arsenic was detected in all but one of the soil samples at concentrations between 1.7 and 3.9 mg/Kg, which is also below the VT soil standard. Low concentrations of mercury were detected in six of the soil samples at concentrations ranging between 0.05 and 0.48 mg/Kg. Cadmium was detected in four of the nine samples at concentrations between 0.12 and 0.15 mg/Kg. Selenium and silver were not detected above the method detection limits in any of the soil samples. Approximate soil sample locations are shown on **Figure 3**, and the soil analytical results are summarized on **Tables 1, 2, & 3** in **Attachment B** and the laboratory report is included in **Attachment C**.

The soil samples were analyzed for the possible presence of per- and polyfluoroalkyl substances (PFAS - EPA method 1633), Polycyclic aromatic hydrocarbons (PAHs - EPA method 8270), and RCRA 8 metals. The soil samples were transported under chain-of-custody to the respective laboratories. The PAH and RCRA 8 metals samples were transported in an ice filled cooler to Endyne, Inc of Williston, Vermont and the PFAS samples were transported in an ice filled cooler to PACE New England Laboratory in East Longmeadow, Massachusetts.

Please call me if you have any questions or concerns regarding the enclosed information.

Sincerely,

Ross Environmental Associates, Inc.

Robert J. Ross, CGWP
Principal Hydrogeologist

Laboratory Report

Enclosed please find the results of the analyses performed for the samples referenced on the attached chain of custody. All required method quality control elements including instrument calibration were performed in accordance with method requirements and determined to be acceptable unless otherwise noted.

The column labeled Lab/Tech in the accompanying report denotes the laboratory facility where the testing was performed and the technician who conducted the assay. A "W" designates the Williston, VT lab under NELAC certification ELAP 11263; "R" designates the Lebanon, NH facility under certification NH 2037 and "N" the Plattsburgh, NY lab under certification ELAP 11892. "Sub" indicates the testing was performed by a subcontracted laboratory. The accreditation status of the subcontracted lab is referenced in the corresponding NELAC and Qual fields. The Williston, VT facility is also ISO/IEC 17025:2017 accredited for Total Coliform and E coli by SM9223B.

The NELAC column also denotes the accreditation status of each laboratory for each reported parameter. "A" indicates the referenced laboratory is NELAC accredited for the parameter reported. "N" indicates the laboratory is not accredited. "U" indicates that NELAC does not offer accreditation for that parameter in that specific matrix. Test results denoted with an "A" meet all National Environmental Laboratory Accreditation Program requirements except where denoted by pertinent data qualifiers. Test results are representative of the samples as they were received at the laboratory

Endyne, Inc. warrants, to the best of its knowledge and belief, the accuracy of the analytical test results contained in this report, but makes no other warranty, expressed or implied, especially no warranties of merchantability or fitness for a particular purpose.

Report Summary of Qualifiers and Notes

M-: The Laboratory Fortified Matrix (LFM) analysis had a recovery lower than defined acceptance limits. This indicates a potential negative bias in the reported value or a difficult sample matrix that resulted in poor reproducibility between sample aliquots selected for analysis.

RPD: Variability observed. The Relative Percent Difference of the Matrix Spike Duplicate was above method acceptance limits.

CASE NARRATIVE SUMMARY

All reported results are within defined laboratory quality control objectives unless listed below or otherwise qualified in this report.

EPA 1633

Qualifications:

L-03

Laboratory fortified blank/laboratory control sample recovery is outside of control limits. Reported value for this compound is likely to be biased on the low side.

Analyte & Samples(s) Qualified:

3-Perfluoropropyl propanoic acid (FPrPA)(3:3FTC)^A

25E0950-01[S-1], 25E0950-02[S-2], 25E0950-03[S-3], 25E0950-04[S-4], 25E0950-05[S-5], 25E0950-06[S-6], 25E0950-07[S-7], 25E0950-08[S-8], 25E0950-09[S-9], B405176-BLK1, B405176-BS1, B405176-MRL1

N-MeFOSAA (NMeFOSAA)

25E0950-01[S-1], 25E0950-02[S-2], 25E0950-03[S-3], 25E0950-04[S-4], 25E0950-05[S-5], 25E0950-06[S-6], 25E0950-07[S-7], 25E0950-08[S-8], 25E0950-09[S-9], B405176-BLK1, B405176-MRL1

PF-17

Extracted Internal Standard recovery is outside of control limits. Data is not significantly affected since associated analyte is not detected and bias is on the high side.

Analyte & Samples(s) Qualified:

D3-NMeFOSAA

25E0950-02[S-2]

N-MeFOSAA (NMeFOSAA)

25E0950-02[S-2]

The results of analyses reported only relate to samples submitted to Pace Analytical Services, LLC - East Longmeadow, Ma, for testing.

I certify that the analyses listed above, unless specifically listed as subcontracted, if any, were performed under my direction according to the approved methodologies listed in this document, and that based upon my inquiry of those individuals immediately responsible for obtaining the information, the material contained in this report is, to the best of my knowledge and belief, accurate and complete.

Meghan E. Kelley

FLAG/QUALIFIER SUMMARY

*	QC result is outside of established limits.
†	Wide recovery limits established for difficult compound.
‡	Wide RPD limits established for difficult compound.
#	Data exceeded client recommended or regulatory level
ND	Not Detected
RL	Reporting Limit is at the level of quantitation (LOQ)
DL	Detection Limit is the lower limit of detection determined by the MDL study
MCL	Maximum Contaminant Level
	Percent recoveries and relative percent differences (RPDs) are determined by the software using values in the calculation which have not been rounded.
	No results have been blank subtracted unless specified in the case narrative section.
L-03	Laboratory fortified blank/laboratory control sample recovery is outside of control limits. Reported value for this compound is likely to be biased on the low side.
PF-17	Extracted Internal Standard recovery is outside of control limits. Data is not significantly affected since associated analyte is not detected and bias is on the high side.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Weston and Sampson Engineers were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: 1417-4592-AFE1

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- Library of Congress
- University Publications of America
- EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

Weston and Sampson Engineers (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available business directory data at approximately five year intervals.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 06/26/2025 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Lists of Federal RCRA generators

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 06/02/2025 has revealed that there are 4 RCRA-VSQG sites within approximately 0.25 miles of the target property.

Lists of state- and tribal hazardous waste facilities

VT SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Conservation's Vermont Hazardous Waste Sites List.

A review of the VT SHWS list, as provided by EDR, and dated 11/25/2024 has revealed that there are 8 VT SHWS sites within approximately 1 mile of the target property.

VT LAST: Leaking Aboveground Storage.

A review of the VT LAST list, as provided by EDR, and dated 11/25/2024 has revealed that there are 3 VT LAST sites within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
BURT RESIDENCE	39 HIGH ST	ENE 1/4 - 1/2 (0.259 mi.)	79	681
Facility ID: 20063556 Contamination: Kerosene Project Status:: Contamination originated from a kero AST. Grossly contaminated soils removed from source area. No lingering impact to indoor air. No groundwater encountered to 15 feet below grade in the source area. Groundwater samples collected from monitoring wells downgradient of the release were non-detect for VOCs. Monitoring wells have been abandoned. All properties in this area are served by the municipal drinking water system.				
EAGLE OIL	BATCHELDER ST	E 1/4 - 1/2 (0.259 mi.)	O81	683
Facility ID: 992586 Contamination: Heating Oil Project Status:: Phase I & II site assessments found minor soil and groundwater contamination in one monitoring well. Below standards. SMAC				
MARSHALL PROPERTY	OLD SCHOOL ROAD	SE 1/4 - 1/2 (0.354 mi.)	86	689
Facility ID: 982492 Contamination: Other Petroleum, Other SVOCs Project Status:: Phase I ESA encountered TPH contaminated soil and GW. 1/4/99 letter required soil disposal manifest, floor drain closure, and 11/13/98 soil lab data for SMAC; building burned down in spring 1999; 5/6/2010 site now Duxbury AutoTech. 1 drum of floor drain sediment disposed of. SMAC				

Lists of state and tribal registered storage tanks

VT UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Conservation's State of Vermont Underground Storage Tank Database.

A review of the VT UST list, as provided by EDR, and dated 04/28/2025 has revealed that there are 20

EXECUTIVE SUMMARY

VT UST sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

ADDITIONAL ENVIRONMENTAL RECORDS

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/02/2025 has revealed that there are 10 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

UST FINDER: EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories. UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

A review of the UST FINDER list, as provided by EDR, and dated 06/08/2023 has revealed that there are 8 UST FINDER sites within approximately 0.25 miles of the target property.

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there are 7 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

Comments: Free product and water in the basement on Monday, PID s of 900. Two AST s in basement, not sure how much product lost, probably 200-500 gallons. Basement is very well sealed with spray foam, only 1 window, no bulkhead.
Action: TMC removed as much free product as possible before the water receded, booms and pads on poly. Removed all debris. 9/6/11 2-4 ppm in basement. Will wash and seal flagstone. Carpet still needs to be removed upstairs by town.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

FINDS:

Registry ID: 110070723162

[Click Here for FRS Facility Detail Report:](#)

Environmental Interest/Information System:

All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database

Registry ID: 110045566632

[Click Here for FRS Facility Detail Report:](#)

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Comments: Customer propped the fill pump open and returned to car, the pump failed to shut off resulting in 2-3 gallons of gasoline released to the pavement

Action: Robert Poulin of Champlain farms used speedy-dri and bio-solve to clean up and contain the gasoline. He informed me that all spent materials were containerized and in a labeled haz waste container on site. He contacted the companies Environmental Officer,

Environmental Interest/Information System:

The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.

(RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

City,State,Zip: WATERBURY, VT
Facility ID: 992722
Source: UST-Gasoline
Closure Date: 11/16/2005
Priority: SMAC - Site Management Activities Completed
Staff: Hugo Martinez Cazon
Source: UST-Gasoline
Site Use: Business
Site Status: Not reported
Contamination: Not reported
Institutional Control: Not reported
Record Last Update: 01/08/2008
Project Status: Site SMACed after review of EIV Consultant letter with evaluation of UST excavation soils. Contamination remaining not indicating impact to receptors offsite.7/12/05 status : former building razed and USTs exposed for PID screening. Limited soil PID detections observed. Soil backfilled, to be covered by Asphalt parking lot. S.I. had previously been Suspended. Awaiting UST pull sometime in subsequent two years.12/07 One of the closed in place USTs remaining was reputedly removed, during the installation of a concrete vault by GMP. No report filed.

Hazardous Waste Summary:

Waste Code: D001
Waste Description: Ignitable Waste

Waste Code: D002
Waste Description: Corrosive Waste

Waste Code: D003
Waste Description: Reactive Waste

Waste Code: D005
Waste Description: Barium

Waste Code: D006
Waste Description: Cadmium

Waste Code: D009
Waste Description: Mercury

Waste Code: D018
Waste Description: Benzene

Waste Code: D039
Waste Description: Tetrachloroethylene

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Facility ID: 20063556
Source Type: Kerosene
Priority: SMAC - Site Management Activities Completed
Staff: Ashley Desmond
Closure Date: 06/13/2008
Site Use: Residential
site Status: Not reported
Contamination: Kerosene
Institutional Control: Not reported
Record Last Update: 09/20/2006
Project Status: Contamination originated from a kero AST. Grossly contaminated soils removed from source area. No lingering impact to indoor air. No groundwater encountered to 15 feet below grade in the source area. Groundwater samples collected from monitoring wells downgradient of the release were non-detect for VOCs. Monitoring wells have been abandoned. All properties in this area are served by the municipal drinking water system.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013	Source: Environmental Protection Agency

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration's document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

Date of Government Version: 06/23/2025	Source: Environmental Protection Agency
Date Data Arrived at EDR: 06/26/2025	Telephone: 202-267-2675

UST FINDER RELEASE: UST Finder Releases Database

US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

Date of Government Version: 06/08/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 10/31/2023	Telephone: 202-564-0394
Date Made Active in Reports: 01/18/2024	Last EDR Contact: 08/13/2025
Number of Days to Update: 79	Next Scheduled EDR Contact: 11/17/2025
	Data Release Frequency: Semi-Annually

UST FINDER: UST Finder Database

EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories. UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 05/04/2025
Date Data Arrived at EDR: 05/06/2025

Version Date: 2021

East Map: 24185833 MIDDLESEX, VT
Version Date: 2021

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

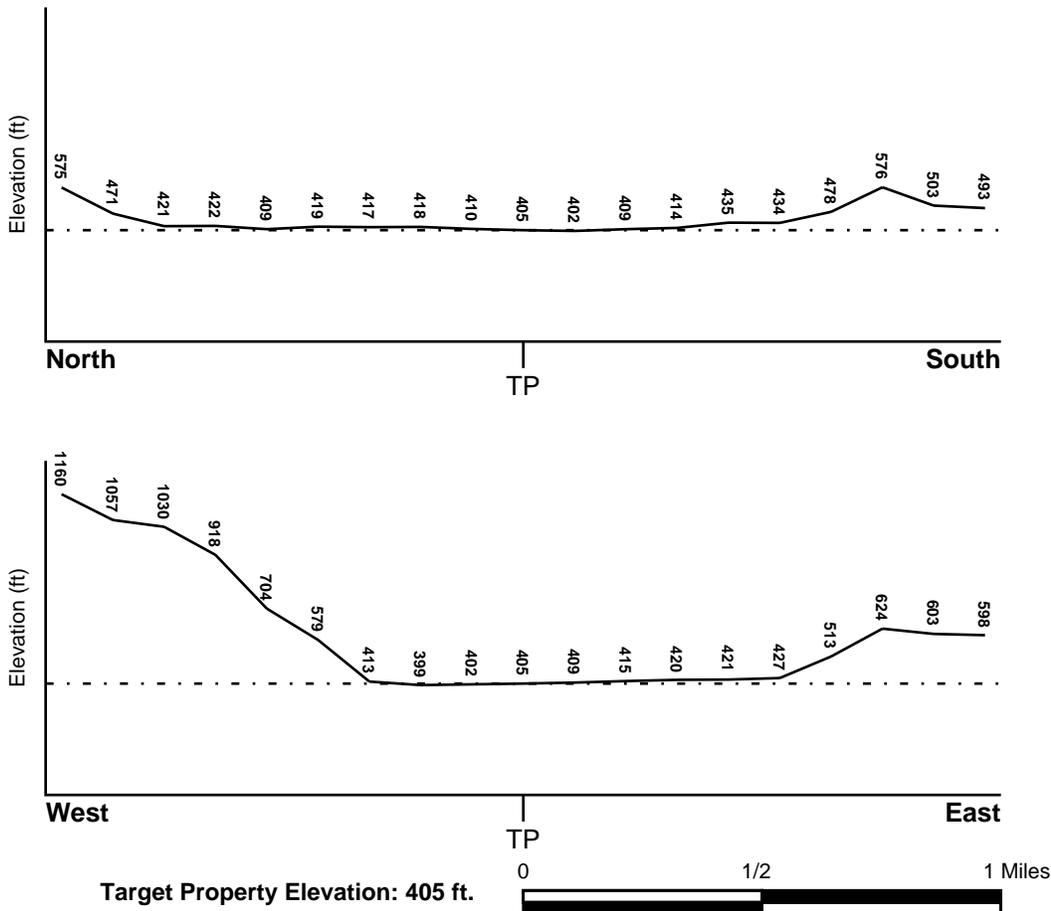

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
50023C0209E	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
50023C0207E	FEMA FIRM Flood data
50023C0226E	FEMA FIRM Flood data
50023C0228E	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
WATERBURY	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Sunday

Soil Surface Texture: fine sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Excessively drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	9 inches	fine sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141.1111 Min: 42.3333	Max: 6.5 Min: 4.5
2	9 inches	64 inches	fine sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141.1111 Min: 42.3333	Max: 6.5 Min: 4.5

Soil Map ID: 2

Soil Component Name: Waitsfield

Soil Surface Texture: silt loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	9 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141.1111 Min: 42.3333	Max: 6.5 Min: 5.1
2	9 inches	20 inches	very fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141.1111 Min: 42.3333	Max: 6.5 Min: 5.1
3	20 inches	64 inches	fine sand	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141.1111 Min: 42.3333	Max: 6.5 Min: 5.1

Soil Map ID: 3

Soil Component Name: Weider

Soil Surface Texture: very fine sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Moderately well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 69 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	5 inches	very fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141.1111 Min: 42.3333	Max: 6.5 Min: 4.5
2	5 inches	25 inches	very fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141.1111 Min: 42.3333	Max: 6.5 Min: 4.5
3	25 inches	64 inches	very gravelly sand	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141.1111 Min: 42.3333	Max: 6.5 Min: 4.5

Soil Map ID: 4

Soil Component Name: Water

Soil Surface Texture: very fine sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class:
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 5

Soil Component Name: Salmon

Soil Surface Texture: very fine sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	6 inches	very fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14.1111 Min: 4.2333	Max: 6 Min: 5.1
2	6 inches	30 inches	very fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14.1111 Min: 4.2333	Max: 6 Min: 5.1
3	30 inches	60 inches	very fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14.1111 Min: 4.2333	Max: 6 Min: 5.1

Soil Map ID: 6

Soil Component Name: Ondawa

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	7 inches	fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141.1111 Min: 42.3333	Max: 6 Min: 4.5
2	7 inches	24 inches	fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141.1111 Min: 42.3333	Max: 6 Min: 4.5
3	24 inches	64 inches	loamy fine sand	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141.1111 Min: 42.3333	Max: 6 Min: 4.5

Soil Map ID: 7

Soil Component Name: Lamoine

Soil Surface Texture: silt loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 31 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	9 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 1.4111 Min: 0.0099	Max: 7.3 Min: 5.6
2	9 inches	16 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 1.4111 Min: 0.0099	Max: 7.3 Min: 5.6
3	16 inches	64 inches	silty clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 1.4111 Min: 0.0099	Max: 7.3 Min: 5.6

Soil Map ID: 8

Soil Component Name: Rumney

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 23 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Source: VT Center for Geographic Information

Telephone: 802-882-3001

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

Radon Test Results

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey.

The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 06/26/2025 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

GEOCHECK[®] - PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

RANDALL MEADOW
RANDALL STREET
WATERBURY, VT 05676

TARGET PROPERTY COORDINATES

Latitude (North):	44.334113 - 44° 20' 2.81"
Longitude (West):	72.758868 - 72° 45' 31.92"
Universal Transverse Mercator:	Zone 18
UTM X (Meters):	678675.7
UTM Y (Meters):	4911209.5
Elevation:	405 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	24185883 WATERBURY, VT
Version Date:	2021
East Map:	24185833 MIDDLESEX, VT
Version Date:	2021

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

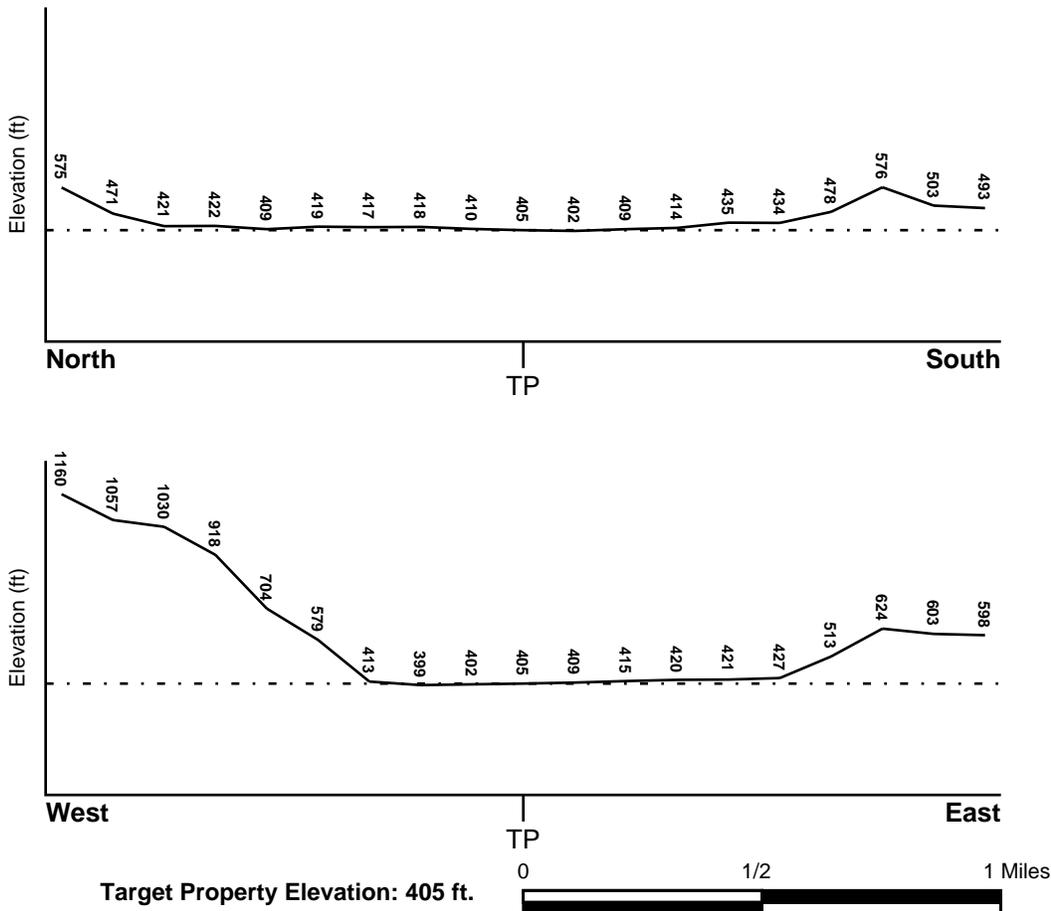

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>

50023C0228E	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
WATERBURY	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Sunday

Soil Surface Texture: fine sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Excessively drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	9 inches	fine sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141.1111 Min: 42.3333	Max: 6.5 Min: 4.5
2	9 inches	64 inches	fine sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141.1111 Min: 42.3333	Max: 6.5 Min: 4.5

Soil Map ID: 2

Soil Component Name: Waitsfield

Soil Surface Texture: silt loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	9 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141.1111 Min: 42.3333	Max: 6.5 Min: 5.1
2	9 inches	20 inches	very fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141.1111 Min: 42.3333	Max: 6.5 Min: 5.1
3	20 inches	64 inches	fine sand	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141.1111 Min: 42.3333	Max: 6.5 Min: 5.1

Soil Map ID: 3

Soil Component Name: Weider

Soil Surface Texture: very fine sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Moderately well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 69 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	5 inches	very fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141.1111 Min: 42.3333	Max: 6.5 Min: 4.5
2	5 inches	25 inches	very fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141.1111 Min: 42.3333	Max: 6.5 Min: 4.5
3	25 inches	64 inches	very gravelly sand	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141.1111 Min: 42.3333	Max: 6.5 Min: 4.5

Soil Map ID: 4

Soil Component Name: Water

Soil Surface Texture: very fine sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class:
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 5

Soil Component Name: Salmon

Soil Surface Texture: very fine sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)

1	0 inches	6 inches	very fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14.1111 Min: 4.2333	Max: 6 Min: 5.1
2	6 inches	30 inches	very fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14.1111 Min: 4.2333	Max: 6 Min: 5.1
3	30 inches	60 inches	very fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14.1111 Min: 4.2333	Max: 6 Min: 5.1

Soil Map ID: 6

Soil Component Name: Ondawa

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	7 inches	fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141.1111 Min: 42.3333	Max: 6 Min: 4.5
2	7 inches	24 inches	fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141.1111 Min: 42.3333	Max: 6 Min: 4.5
3	24 inches	64 inches	loamy fine sand	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141.1111 Min: 42.3333	Max: 6 Min: 4.5

Soil Map ID: 7

Soil Component Name: Lamoine

Soil Surface Texture: silt loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 31 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

2006-2007
Nordic Center Assistant Director
Smuggler's Notch Ski Resort

2003-2006
Laborer
G.W. Tatro Construction

EDUCATION

2005
Bachelor of Science
Geology
St. Lawrence University

Lee has 16 years of experience in the field of environmental assessment and cleanup. He has extensive experience conducting high resolution site characterization using direct push and direct sensing tooling. He has been responsible for design and implementation of Phase I, II, and III environmental assessment, Brownfields, and remediation projects in Vermont. Clients have included state and federal regulatory agencies, government organizations, regional planning commissions, utilities, developers, and other private entities. He has presented polychlorinated biphenyl and Brownfields-related talks at professional meetings throughout New England.

**SPECIFIC PROJECT EXPERIENCE**

Brownfield Redevelopment, Burlington, Vermont. Project Manager for Phase I/II/III ESA and cleanup of 16-acre property in Burlington, Vermont with over 70-years of industrial history that resulted in PAH contaminated soil and widespread PCB contamination in an 80,000 square-foot building and exterior subsurface piping structure. Prepared Corrective Action Plan in accordance with the VT DEC Investigation and Remediation of Contaminated Properties Rule and a Self-Implementing/Risk-Based Cleanup Plan in accordance with 40 CFR 761. Cleanup plans were approved by VT DEC and EPA in April 2019 and corrective actions were completed in March 2020. Corrective actions included removal of PCB bulk products, targeted removal and off-site disposal of highly PCB-contaminated concrete, on-site encapsulation of low-level PCB-contaminated concrete and PAH contaminated soil, closure of an underground storage tank, and a performance-based PCB assessment and cleanup of subsurface piping structure that was discovered during site work. Cleanup of the piping structure involved sealing a large diameter pipe approximately ten feet below grade that was hydraulically connected to Lake Champlain to allow for excavation, dewatering, and excavation of PCB contaminated

Brownfields Redevelopment, Rutland, Vermont. Project Manager for Phase II Environmental Site Assessment and Corrective Action Plan at childcare facility. Used incremental sampling methodology to assess surface soil quality in support of remedial planning. Additional field tasks included defining the extent of lead contaminated soils using an XRF, groundwater monitoring well installation and subsequent sampling, and a vapor intrusion assessment. Developed a Corrective Action Plan to remediate conditions that present an unacceptable exposure risk to site users and presented proposed actions to concerned citizens at a public meeting. Corrective actions were completed in 2018, including installation of engineered barriers and a sub-slab depressurization system, which is substantially complete but awaiting building renovation for startup. (with previous employer)

Brownfields Redevelopment, Burlington, Vermont. Conducted a three-year hydraulic monitoring study at a property adjoining the Pine Street Barge Canal Superfund site in Burlington, Vermont, which is heavily contaminated with coal tar non-aqueous phase liquid (NAPL) as the result of past coal gasification operations. Project objective was to understand site hydrogeology conditions prior to development to avoid actions that could potentially mobilize coal tar NAPL. Manual water level and NAPL measurements were collected bi-monthly from approximately 45 groundwater monitoring wells from 2015-2018. Installed pressure transducers in twenty wells and used In-Situ telemetry technologies to monitor water levels remotely. Provided senior technical advice for 2022 site investigation work to support redevelopment as a bowling alley and Nordic spa. Site investigation work is focused on continued monitoring of site hydraulic conditions, soil and groundwater quality, and evaluating the risk of vapor intrusion into the proposed building to inform an Evaluation of Corrective Action Alternatives. (with previous employer)

Brownfields Redevelopment, St. Johnsbury, Vermont. Project manager for a Phase I/II/III ESA of a property in St. Johnsbury, Vermont that has been in industrial and commercial use since 1900, including grain and coal storage and a machine shop. Prepared a Partial Corrective Action Plan to address management of urban soils containing elevated concentrations of PAHs and metals and mitigate vapor intrusion of trichloroethylene and naphthalene into a building being renovated as an industrial hemp processing facility. Conducted a Remedial Design investigation to evaluate and select the appropriate cleanup of a subsurface petroleum release related to a former gasoline underground storage tank.

Phase I/II ESA/Corrective Action Feasibility Investigation/Corrective Action Plan, City Market/Onion River Cooperative, Burlington, Vermont. Conducted Phase I ESA site inspection at a four-acre site in Burlington, Vermont with a long history of industrial practices, including bulk petroleum storage and operation as a foundry. Developed a Phase II ESA workplan to address data gaps associated with site Recognized Environmental Conditions. Led Phase II ESA field efforts, which included soil gas, groundwater, soil, and polychlorinated biphenyl (PCB) in building materials assessments over a three-week period. The soil assessment used a combination of targeted borings and Incremental Sampling Methodology (ISM) approach. Managed and assessed data in preparation of a Phase II ESA report. Prepared a Corrective Action Feasibility Investigation/Corrective Action Plan focused on remedial strategies to mitigate risk of vapor intrusion into a proposed grocery store at the site and the risk of direct contact with PAH, metals, and VOC contaminated soil by construction workers and site users. Wrote dust monitoring plan for demolition phase of project and conducted performance testing of the vapor mitigation system during site redevelopment, which was completed in 2017. The formerly blighted property is now a vibrant cooperative grocery store. (with previous employer)

PROFESSIONAL CERTIFICATION

Certified Hazardous Materials
Manager

OSHA 10-Hour
HAZWOPER 40-Hour

Taylor is a project environmental scientist in Weston & Sampson's Environmental, Geotechnical, and Energy (EGE) group. A Certified Hazardous Materials Manager (CHMM), his responsibilities have included managing field teams, performing data analysis, and interpreting and reporting results for both public and private sector clients. He has experience in all phases of assessment from the creation of work plans through final reporting. Taylor has worked on a variety of projects funded by the US Environmental Protection Agency (EPA) including brownfields and polychlorinated biphenyls (PCB) cleanups. He also has extensive experience with emerging contaminants such as per- and poly-fluorinated alkyl substances (PFAS) and is an expert at sampling media including soil, water, sludge, building materials, soil gas, and air.

SPECIFIC PROJECT EXPERIENCE

Former Bourne's Energy Site, Waterbury, Vermont. Project manager for the long-term monitoring of a former petroleum facility. This project is ongoing, and tasks have included management of a field program involving the collection of groundwater samples.

Maquam Bay of Missisquoi Phase II ESA, Swanton, Vermont. Managed a field program for multiple phases of an environmental assessment to support the renovation of the Maquam Bay of Missisquoi tribal headquarters. The field tasks included the collection of soil, soil gas, and groundwater samples. Subsequently completed an analysis of brownfields cleanup alternatives that was submitted to the State of Vermont and the EPA.

Former Parks and Woolson Facility, Springfield, Vermont. Performed a field investigation involving the sampling of building materials, soil, soil gas, and groundwater at a large former machine shop facility. Managed data and presented results. Assessment is ongoing.

PFAS Investigation, Bennington, Vermont. Sampled drinking water to assess concentrations of PFAS detected in drinking water wells throughout Bennington on behalf of the State of Vermont. Performed visualization, presented data, and interpreted results.

Lot 7D, Winooski, Vermont. Performed construction oversight for the redevelopment and conversion of an urban parcel into a hotel and condominium complex located in downtown Winooski.

560 Railroad Street, Saint Johnsbury, Vermont. Provided construction services for the redevelopment of a former tenement home adjoining the rail line. Characterized soil and obtained landfill acceptance for materials generated during construction as well as other miscellaneous reporting.

2 Franklin Park West, St. Albans, Vermont. Constructed Sub-Slab Depressurization System (SSDS) in an auto dealership, designed to mitigate a plume of chlorinated solvents present in groundwater beneath the site building.

11 North Main Street, Northfield, Vermont. Managed a field investigation that included the sampling of soil, groundwater, and soil gas at a brownfields site that formerly housed facilities for granite processing and machine repair.

300-302 Granger Road, Berlin, Vermont. Completed a Phase I ESA for a former truck stop.

Pownal Tannery Superfund Site, Pownal, Vermont. Managed field investigation that included the sampling of sediment, groundwater, and soil gas at a Superfund site. Managed data and reported results.

Johnson Village Garage, Johnson, Vermont. Completed a Phase I ESA for a former talc milling facility and current municipal utility garage.

Twin City Plaza, Berlin, Vermont. Completed a Phase I ESA for a commercial plaza/former gas station.

Intervale Center, Burlington, Vermont. Implemented a field program involving screening soil using an X-Ray Fluorescence (XRF) meter. Performed confirmatory sampling of soil for laboratory analysis.

Former Connor Homes Site, Middlebury, Vermont. Completed a Phase I ESA for a former printing and home manufacturing facility that is now housing a cannabis cultivation and processing.

Former Bergeron, White River Junction, Vermont. This site, currently the home of an automobile dealership that previously operated as a vehicle service facility, was once home to a dry-cleaning facility. The site is impacted with tetrachloroethene (PCE) in groundwater and soil gas. Provided oversight of Phase II ESA field activities and reporting.

Fred's Auto, Hyde Park, Vermont. Investigation of this site that previously housed a gas station and is currently the home of an automobile repair facility. Completed a Site-Specific Quality Assurance Project Plan (SSQAPP), managed a field program involving sampling a variety of media, reported data, and interpreted results.

Blood Farm, Putney, Vermont. Performed an environmental assessment at a waste paper landfill impacted with PFAS. Collected data and reported results. Completed an ESA. Corrective action is ongoing.

66 Atkinson Street, Bellows Falls, Vermont. This vacant property once housed a church and YMCA facility and will be redeveloped as a community garden. Completed a SSQAPP. Completed a field program involving the sampling of soil. Preparation of a Corrective Action Plan (CAP) is ongoing.

Berwick Block, Rutland, Vermont. Completed an I-Rule compliant Work Plan and drafted a report for this parcel of land that formerly housed the Hotel Berwick and Rutland Herald newspaper offices and printing facilities.

Vermont Farmers Food Center, Rutland, Vermont. This former marble and ironworks facility currently houses a nonprofit organization. The project included completion of a SSQAPP and a CAP, and the management of a field program involving sampling a variety of media, reporting the data, and interpreting the results.

Conway Park, Somerville, Massachusetts. Served as a resident representative for the Conway Park Superfund remediation and field redevelopment, performed data gathering, reporting, and documentation throughout assessment, remediation, and redevelopment of the park over the course of four years. Liaised with the city, EPA, and the Massachusetts Department of Environmental Protection (MassDEP) and others through the project duration.

Green Line Extension (GLX), Medford, Somerville, and Cambridge Massachusetts. Served as MBTA's primary environmental field inspector for the GLX light rail project for over three years. Additional project responsibilities included gathering, maintaining, and presenting data related to ongoing environmental responses along the right-of-way.

ASTM Phase I Environmental Site Assessments (ESAs), Various Locations, Vermont, Massachusetts, New York, and New Hampshire. Completed all aspects of Phase I ESA reporting for both the private and public sector at multiple locations in support of proposed brownfields reuse, solar photovoltaic system development, and general property transfers. Project responsibilities included site reconnaissance, figure preparation, interviews, municipal file reviews, database searches, and preparation of Phase I reports.

Murphy Playground and Robinson Playground, Brookline, Massachusetts. Performed a variety of tasks at these two properties that formerly housed a sand pit and served as a car-barn property used for streetcar maintenance. Project responsibilities included Phase I ESA reporting, data gathering, figure creation and interpretation.

Bartlett Yard, Roxbury, Massachusetts. Performed various tasks at a former streetcar and bus maintenance facility. Responsibilities included Phase I ESA reporting, data gathering, figure creation, and interpretation.

PFAS Impact Investigation, Pownal and North Pownal, Vermont. Investigation of per- and polyfluorinated alkyl substances (PFAS) impact on public and residential drinking water supply wells. Coordinated with residents and the state for sampling of both the public and private water supplies. Sampled private wells and point-of-entry treatment (POET) filtration systems.

Environmental Site Assessments, Boston Housing Authority, Massachusetts. Assessed 47 properties for potential environmental hazards. Performed field work required for Phase I reports, and conducted historical research through municipal records, insurance maps, DEP records and inspectional services records. Participated in all aspects of report writing including figure preparation, analysis, and identifying Recognized Environmental Conditions (RECs).
